Memo on Transporting Wheelchairs in Vehicles Using Permolock

A user may ride in a Permobil C300, C350, K450, C400, or C500 of appropriate configuration in a motor vehicle, when properly secured by both a Permolock wheelchair lockdown system AND a crash tested lap and shoulder belt, which is secured to the motor vehicle. A "crash tested lap belt" does NOT include the positioning belt attached to the wheelchair. The wheelchair belt is designed to position the user in wheelchair during ordinary use. It is not designed to protect the user against injury while riding in the wheelchair in a vehicle. Users who pursue riding in or driving vehicles in their wheelchairs assume a great risk. We urge them to give careful consideration to this pursuit.
