

FLEXIBILITY IS BOUNDLESS.

The streamlined design and robust power that you expect from Permobil's high-grade power wheelchairs is once again presented in the new front wheel drive C300 TS. No other wheelchair in this category offers the perfect combination of stability, seating comfort and versatility that this model does at the best overall price. Thanks to Permobil's passion for engineering you now have an even broader choice of seating systems.

The TS (Tension Seat) system's strongpoint is its adjustability. The built-in, individually tensionable, straps in the backrest and under the seating surface allow the seating to be shaped exactly to the user's needs. Integrated UniTrack profiles provide fast and seamless adjustment of seat depth, armrest height and positioning of optional supports to provide optimum seating comfort. Up to 4 powered seat functions: seat elevator, tilt, recline and legrest, are available as options.
